Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-7 and 9-15 are pending in this application.

Specification

1. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

Action Summary

2. The rejection of claims 1-7 and 9-15 under 35 U.S.C. 103(a) over Stiefel et al. or Gaull in view of Mrklas et al. is being maintained for the reasons stated in the previous office action.

Response to Arguments

3. Applicant's arguments filed August 10, 2005 have been fully considered but they are not persuasive.

Applicants argue that the combination of the Stiefel et al. or Gaull in view of Mrklas et al. does not teach the claimed invention. Examiner disagrees. It appears to the examiner that this is a two-component process. The first component is an anti-acne composition to reduce the number and the severity of the acne lesions. The second component is a regimen to downregulate the activity of the HPA axis comprising a sensory regimen comprising at least two stimuli selected from auditory, visual, tactile, gustatory and olfactory. The combination of the above-mentioned references teaches

the claimed invention. Stiefel et al. or Gaull both teach compositions used to treat skin disorders involving the sebaceous gland and follicles. This teaches the first component of the invention. Mrklas et al. teaches a system for reducing stress wherein the system provides relaxing visual, auditory, tactile, environmental effects. This teaches the second component of the invention. It is the position of the examiner that the example used in the previous office action would be reason enough to combine the about references to disclose the claimed invention.

Conclusion

4. Claims 1-7 and 9-15 remain rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
